Description:	The cause is under investigation however white smoke containing SO2 is being released. Neighborhood testing is being done and so far the results are within non-hazardous limits however should the concentration increase, there is a potential for an iinhalation hazard. The release is nearly contained.

Description:	Fire in the crude oil, releasing crude oil. Chevron Fire Dept. is being assisted by municipal department(s). The runoff water is going into the refinery's treatment system. 10-20 employees have been evacuated from the field offices adjacent to thee facility. The caller states this is not really big fire and it appears to be under control or nearly controlled.

Description:	Underground line leak occurred possibly due to external corrosion. Discovered on Friday 2/12/98. Leak possibly started sometime in December 1998. The leak has been stopped. The immediate area has been excavated and cleaned up. There are still hydrocaarbons in the area under railroad tracks that cannot be cleaned up. Testing to determine if ground water was contaminated has proved negative.

Description:	Flare release at the oil refinery. Local air quality district asked Chevron to monitor the flare releases. During the monitoring it was discovered they were releasing an average of 80 lbs per day into the atmoshere. Chevron is taking step to mitigaate the problem. They are making the report in accordance with CERCLA, Section 103 (f) 2, Code of Federal Regulations.

Comments: Preliminary Assessment: Occasional citizen complaints: odor by migrating gases; effluents along the beach; natural seepage of oil along a fault below Santa Monica Bay. Facility is a petroleum refinery in operation since 1911. Incident (04/30/80): Letter in SCAQMD - release of light hydrocarbons to air. Enforcement History (04/30/81): Agreement letter to DHS - Five-year clean-up of 33 oily basins. Preliminary Assessment completed (RCRA 3012) and submitted to EPA.
